Not All Double Glazing is the same.

VacGlaze™ includes Exterior and Interior Toughened Safety Glass, a Vacuum Insulated Gap and Low 'E' Coating to achieve an industry best [U 0.7 Thermal Performance Rating](#).

VacGlaze™ Superior Performance Vacuum Insulated Double Glazing delivers up to 3x the thermal performance and energy efficiency savings of standard double glazing.

Exterior and Interior Toughened Safety Glass

Toughened Glass, also known as tempered glass is four to five times stronger than standard glass and will crumble uniformly into small fragments or pebbles, rather than splintering into dangerous shards if struck by an extremely hard impact.

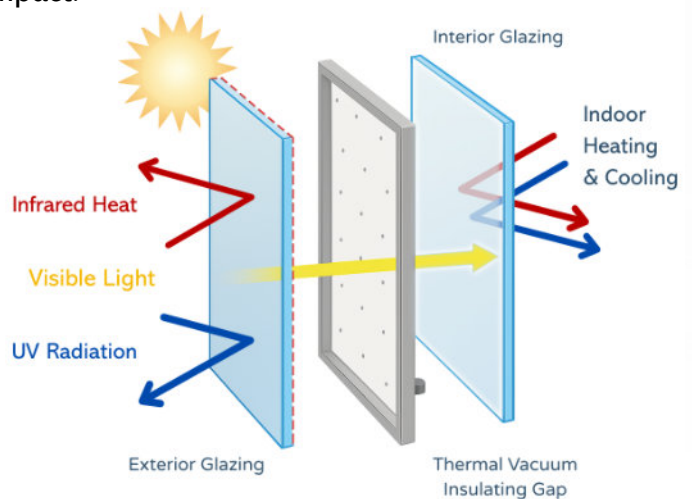

Energy Efficient Vacuum Insulated Gap

Double Glazing energy efficiency is significantly enhanced by completely extracting the air between the two glazing panes to create a true Vacuum Seal to achieve maximum energy efficiency.

VacGlaze™ Includes Special Low 'E' Glazing

Low-E is a transparent nano-metallic coating that is infused onto the VacGlaze™ interior pane of glass to provide enhanced thermal performance.

Low-E reflects direct radiant heat and UV away from your home in Summer, while indoor heat is reflected back into your home in Winter to boost thermal performance.

The Superior Double Glazing Solution

Made to outperform traditional double glazing, VacGlaze™ provides a Superior level of insulation for your existing windows and doors, delivering Superior Protection against outside Heat and Cold.

TwinGlaze® Complete Transformation of all existing Windows & Doors

- Includes removal and recycling of your existing glass and installation of [VacGlaze™ Superior Double Glazing](#) into your existing windows and doors.
- [Sliding Windows & Doors](#) Includes complimentary replacement of your seals and rollers with thermal and acoustic brush seals and new rollers.
- [Awning and Hinged Windows & Doors](#) Includes complimentary replacement of your existing seals with thermal and acoustic compression seals.

Double Glaze Your Existing Windows & Doors

ACT | VIC

Fully Insulated for Hot, Cold & Mixed Climates

TwinGlaze®

Compare VacGlaze™ Superior Double Glazing to other glazing options.

“ The lower the U Rating ... The more energy efficient. “

	VacGlaze™	Triple Glazing	Double Glazing	Single Glazing (4mm)
U Thermal Rating	0.7	1.0 to 1.3	1.4 to 2.4	5.8
SHGC Solar	0.56	0.48	0.71	0.87
Rw Acoustic	34	35	31	25

* An expected sound reduction of up to 9db in comparison to standard 4mm single glazing.

✓ Exterior and Interior Toughened SAFETY Glass

Toughened Safety Glass has an impact resistance level that is five times stronger than standard glass for Greater Safety and compliance with Australian Standard.

✓ Vacuum Insulated Thermal Gap

A Vacuum Seal void with all air removed creates the best thermal insulating barrier for Superior Energy Efficiency and Reduction in Condensation.

✓ Special Low 'E' Coating

VacGlaze™ includes Low 'E' Thermal Glass to boost energy efficiency and reduce your energy bills in Summer and Winter.

✓ Enjoy Life Long Comfort & Savings in Gas & Electricity

Fully Insulated to Reduce Heat Loss in Winter and Heat Gain in Summer.

✓ Improve the Acoustic Performance of your Windows & Doors.

Reduction in incoming outside sound for increase peace and comfort.

✓ Increase Property Value

VacGlaze™ is a Smart Home Improvement that can increase the value of your property.

✓ Sustainable Energy Efficiency

Making your home more sustainable by double glazing your existing frames substantially reduces your consumption of traditional and renewable energy resources to reduce your carbon footprint.

TwinGlaze® is better for the environment because it saves the Earth's resources by not having to manufacture new windows to replace your current windows and also reduces land fill by not having to dispose of your perfectly fine existing windows.
